ABOUT ME

UI/UX and Product Designer with 7+ years of experience creating impactful digital experiences across web and mobile platforms. Skilled in UX research, interaction design, wireframing, prototyping, and design systems. Experienced in designing SaaS platforms, enterprise applications, e-commerce solutions, and AI-powered products. Combines design expertise with front-end development skills in HTML, CSS, JavaScript, WordPress, and Shopify to deliver intuitive, scalable, and business-focused digital solutions that enhance usability and user engagement.

EXPERIENCE

Teamroids

Nov 2024 - Aug 2025 | Apr 2026 – Present

UI/UX Designer | CMS Developer

- Led the end-to-end e-commerce redesign, delivering a modern, responsive interface and improved shopping experience.
- Simplified checkout forms and purchasing workflows to address customer drop-offs and reduce friction during order completion.
- Enhanced account management, profile editing, and address updates, making customer interactions more efficient.
- Optimized technical SEO, website structure, and page speed to improve search visibility and loading performance.
- Improved navigation and responsive layouts to ensure consistent experiences across desktop and mobile devices.
- Supported an e-commerce platform processing 100+ orders daily while contributing to AI-driven customer experience enhancements.

TechUnicorn / CXUnicorn

August 2025 – May 2026

Senior UI/UX Designer | CMS Developer

- Redesigned enterprise websites and mobile apps for Kuwait's Ministry of Justice, Ministry of Health, Payoneer, and Santa Barbara County, enhancing usability and visual consistency.
- Simplified workflows across Tawtheeq, Real Estate Registration, and Adl platforms, improving citizen access to digital services.
- Integrated AI solutions, including conversational interfaces, agentic workflows, AI bots, and Soul Machines avatars.
- Delivered user flows, wireframes, prototypes, and high-fidelity designs, streamlining design-to-development handoff.
- Applied WCAG accessibility standards to create inclusive digital experiences for users of diverse abilities.
- Enhanced Payoneer's website and developed reusable components and customized Wix websites, improving consistency and scalability.

Edible Arrangements

August 2021 – October 2024

Software Engineer – UI/UX & Frontend Development

- Led end-to-end design and development of business, NGO, and e-commerce websites across multiple industries.
- Redesigned Edible Arrangements and related e-commerce platforms, driving 45%+ traffic growth and 80% customer retention through strategic UI/UX improvements.
- Simplified navigation, accessibility, and checkout flows to reduce usability barriers and improve the customer journey.
- Developed POS and franchise management interfaces for Naranja and Sweet and Crunch, supporting more efficient operational workflows.
- Built responsive WordPress and Shopify websites using HTML, CSS, JavaScript, React, and Shopify Liquid.
- Improved technical SEO, content structure, and page speed to strengthen search visibility and support repeat client engagements.
- Delivered digital campaigns and website redesigns for brands including Edible Arrangements, KFC, and Edible Flowers.

Aibers

January 2021 – July 2021

UI/UX Designer & Frontend Developer

- Designed and developed responsive healthcare portals using Figma, React, JavaScript, HTML, CSS, and Bootstrap.
- Implemented automated BMI calculations, reducing manual tasks and saving time for doctors and front-desk staff.
- Redesigned appointment and prescription modules, simplifying workflows and making patient interactions more efficient.
- Built interactive dashboards and reusable UI components to improve access to clinical and operational data.
- Translated healthcare requirements into user flows, prototypes, and functional interfaces.

SAS Group of Companies

December 2018 – December 2020

UI/UX Designer & Frontend Developer

- Designed and developed social, entertainment, and community platforms, including Gameboggy, Aoyo, and Moviesbeep.
- Created intuitive interfaces for social networking, forums, messaging, video calling, gaming, and movie discovery.
- Redesigned familiar features inspired by platforms like Facebook, Quora, Medium, YouTube, and Zoom to address user pain points and improve usability.
- Developed interactive dashboards and data visualizations using Highcharts.
- Improved navigation, responsive layouts, and user journeys, helping increase engagement and strengthen user retention.
- Delivered consistent UI experiences across multiple platforms and screen sizes.

Nitro9

July 2018 – November 2018

UI/UX Designer & WordPress Developer

- Delivered 10+ WordPress websites for business, legal, and e-commerce clients, managing projects from requirements to launch.
- Designed and customized responsive layouts, improving brand consistency and usability across devices.
- Optimized website structure, navigation, and on-page SEO to improve search visibility and user experience.
- Managed ongoing maintenance, content updates, and performance optimization to ensure reliable website operations.
