E-COMMERCE | FRONTEND DEVELOPMENT

Edible Arrangements

UX and frontend improvements across e-commerce sites and franchise-management platforms, backed

PLACEHOLDER: replace this file with the final case study PDF.

PROBLEM

E-commerce and franchise-management sites needed better UX and a scalable frontend.

MY ROLE

UX Designer & Frontend Developer

KEY DECISIONS

- Ran research and usability testing to find friction
- Built reusable React components and a design system
- Tested flow changes with A/B experiments

OUTCOME

Confidential client work. Results and a walkthrough are shared on request.
